

VOLNAY PV

Colour: Tudor Brown

Colour: Tudor Brown ▼

Waterproof and robust

The interlock system ensures excellent watertightness. A water diverter in the top left interlock sheds rainwater away from the intersection of the joints. Several reinforcement ribs on the underside emphasize the strength of the tile.

Pure and elegant lines.

Its fine and elegant bevelled nose and its graceful lines enhance the plain tile "feel" of roofs it covers.

Volnay PV is both elegant and reliable, and has immediately set a new standard among large flat interlocking tiles. Heir to the Volnay Lambert, from which it received the legendary robustness and an excellent watertightness, the Volnay PV tile offers a generous 68 mm variable gauge. It has the same overall dimensions as its predecessor, and is compatible with all accessories common to Terreal's 10 per sq.m. variable gauge tiles. It is laid broken bonded.

Its fine and elegant bevelled nose and its graceful lines enhance the plain tile «feel» of roofs it covers. Volnay PV comes in six rich and authentic colours to fit everywhere.
