Natural Slate Ridges imported exclusively by Ribble Valley Slate Ltd have been extensively used across the UK for over 15 years

450mm long, 150mm wings, 15mm thick

Standard angles are 90°, 105°, 115° & 125°. Other special production items include “mono” ridges and angles such as 75° and 135°

Plain (butt jointed) and Capped (collared) designs

Hip and gable stop ends also available

Approximate unit weight 6kgs (dependant on type)

Black (Graphite) and Grey/Green colours match most natural slates

Riven (natural split) face and gauged (sawn) underside

Constructed from two pieces of Brazilian slate, bonded using two part epoxy resin and reinforced with steel pins

Source slate material fully tested to BS-EN 12326:1 2004 (slate and stone products for discontinuous roofing & cladding) Achieving A1, S1 & T1 ratings for water absorption, carbonate content and reactive minerals

Can be wet fixed using traditional mortar or dry fixed, please contact us for further advice

Extremely cost effective, especially when compared with clay alternatives

Specialist supplier of natural slate, including roofing, ridge tiles, flooring, work surfaces, and designer garden furniture

Registered in England No. 06862317
