

DESIGNED BY LBS

Snowdon®

Interlocking clay slate

The Snowdon is a large format, interlocking clay tile with a riven surface and dressed edges that has been designed to look like a natural slate. It has a permanent colour and is simple and cost effective to install – requiring only 50% of the pieces per square metre when directly compared to slate.

LBS offer full technical support and can provide a full site-specific fixing spec on request. We are also on hand to advise on the latest BS5534 and S.R. 82 fixing regulations. Regulations now require that any single-lap interlocking tile MUST have a minimum of one mechanical fixing per tile.

BENEFITS

- Permanent non-fading colour & riven finish
- 60 year guarantee
- Only 10 tiles per m²
- Available in Natural Black or Heather
- Suitable for all required head-laps
- Full range of ridges and accessories available
